

Please download the data template and input species occurrence data for the project focal species listed below. If you have data for more than one species, please include it in a single data sheet if practical. The data template includes descriptions of all data fields.

### **Plants**

Ocmulgee Skullcap (*Scutellaria ocmulgee*)

Purpledisk Honeycombhead (*Balduina atropurpurea*)

### **Mussels**

Cumberland Moccasinshell (*Medionidus conradicus*)

Southern Elktoe (*Alasmidonta triangulata*)

Tennessee Heelsplitter (*Lasmigona holstonia*)

Tennessee Pigtoe (*Pleuronaia barnesiana*)

### **Crayfishes**

Hiwassee Headwaters Crayfish (*Cambarus parrishi*)

Little Tennessee Crayfish (*Cambarus georgiae*)

### **Fishes**

Carolina Pygmy Sunfish (*Elassoma boehlkei*)

Robust Redhorse (*Moxostoma robustum*)

Please email compiled data and any questions to:

zachariah.abouhamdan@dnr.ga.gov

brett.albanese@dnr.ga.gov

Georgia DNR will use your data to develop range-wide conservation status assessment maps. Alternatively, you may develop your own status map by downloading the status mapping algorithm from this website.
